Have a great day,
find your way

"Yes, I do think your cousin will be upset if you wear the new hat to her wedding."

Hi

Has a dictator ever shunned recognition?

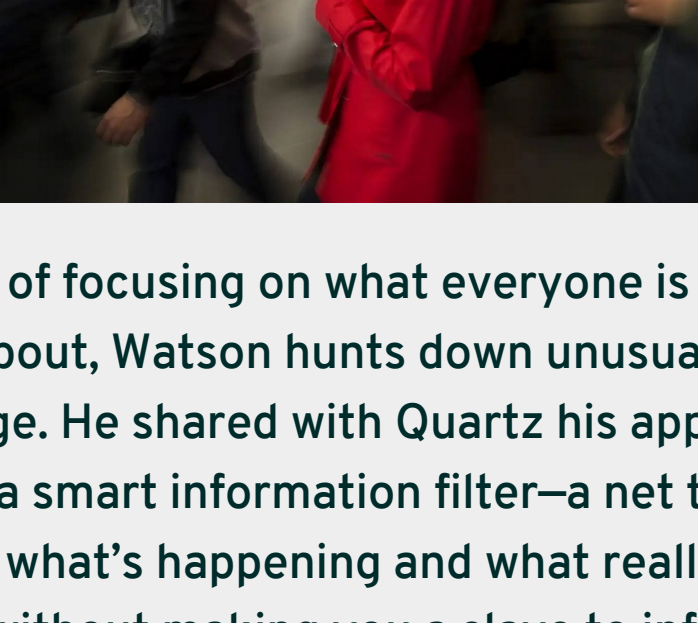

There is not enough attention to be found laying around for the gratification and sustentation of the one with the endless craving.

You know this form of life, the one that can't be redirected outward, away from itself would be a hill too steep to climb without applause.

There appears no cure, which is fair as it happens that no cure is sought when the need is greater than the lure of introspection and awareness.

What an odd pursuit, to be so clearly beyond the comfort of reality, warmed by the illusion that the greater good is served by you, and only you.

**When this becomes that
What Is a Paradigm Shift?**

"A paradigm theory is a general theory that helps to provide scientists working in a particular field with their broad theoretical framework—what Kuhn calls their “conceptual scheme.” It provides them with their basic assumptions, key concepts, and methodology. It gives their research its general direction and goals. It represents an exemplary model of good science within a particular discipline.

A paradigm shift occurs when one paradigm theory is replaced by another. "

How to read less news but be more informed, according to a futurist

" Instead of focusing on what everyone is already talking about, Watson hunts down unusual knowledge. He shared with Quartz his approach to creating a smart information filter—a net that captures what’s happening and what really matters without making you a slave to information of fleeting importance. "

This is awesome

**What a Body Built to Last
100 Years Would Look Like**

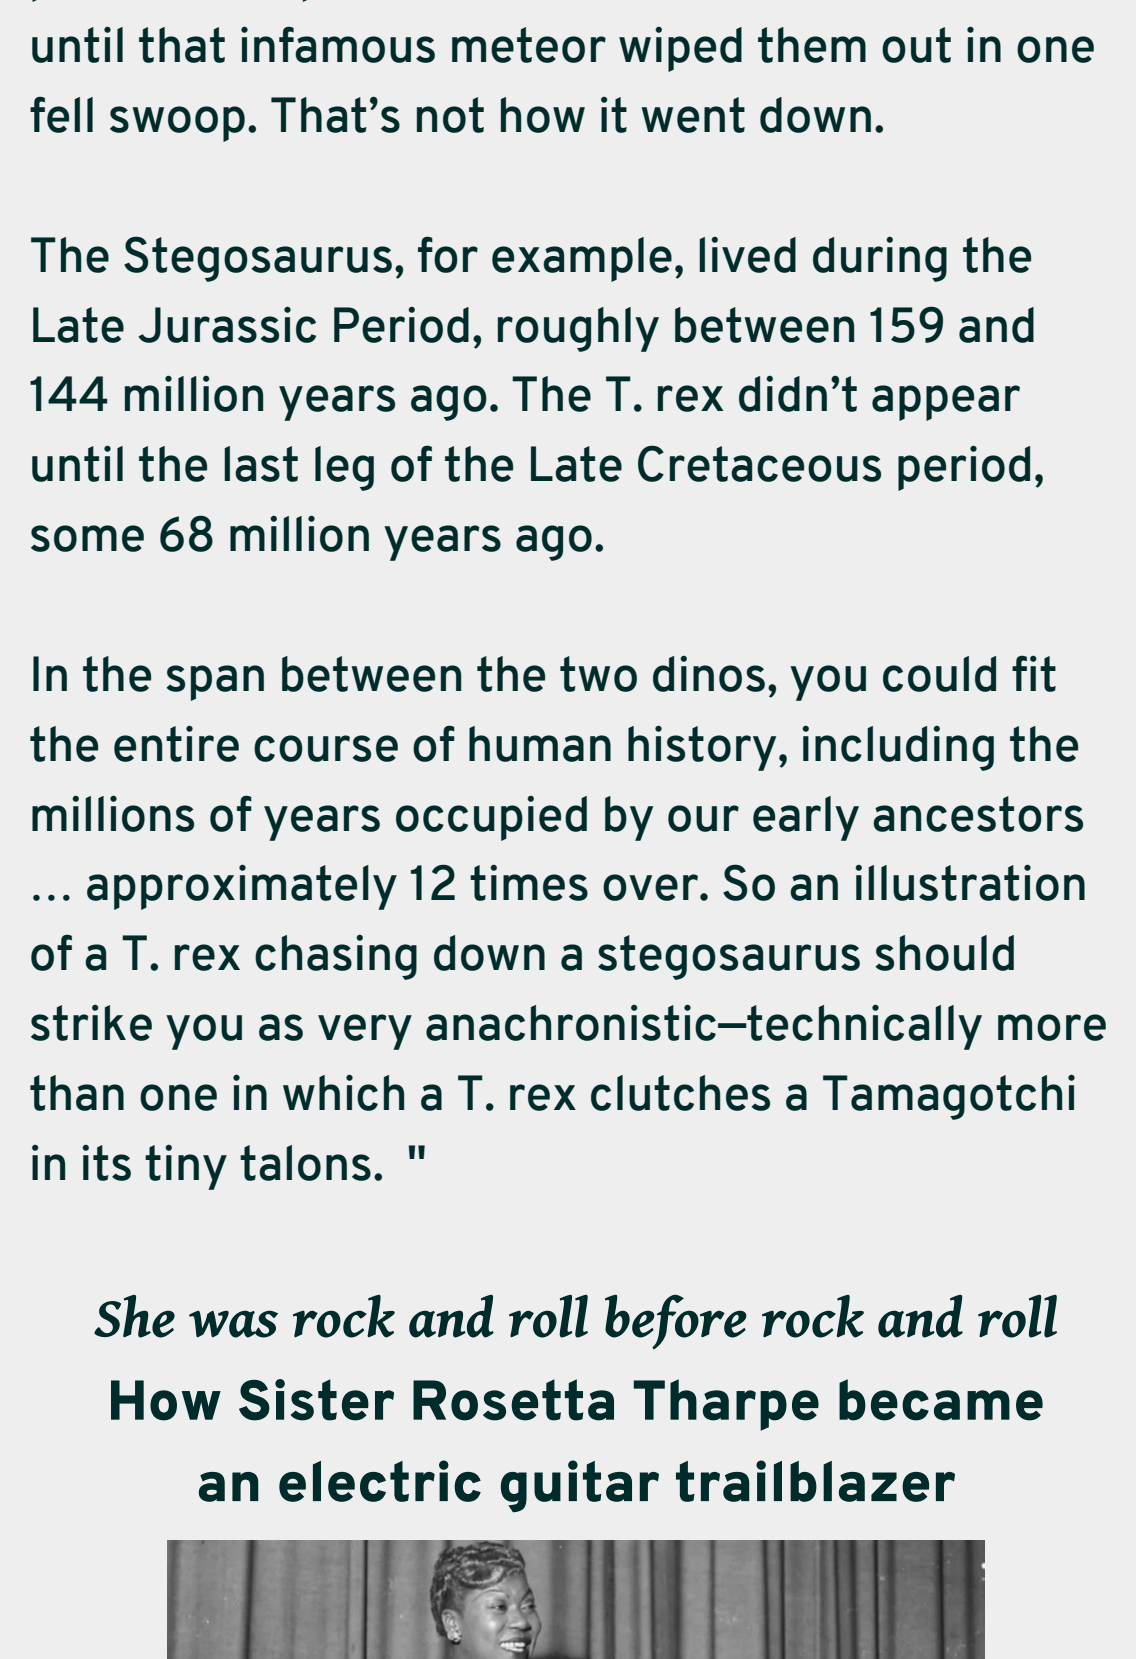

" In evolutionary terms, we harbor flaws because natural selection, the force that molds our genetically controlled traits, does not aim for perfection or endless good health. If a body plan allows individuals to survive long enough to reproduce (and, in humans and various other organisms, to raise their young), then that plan will be selected. "

July 4, 1862

Alice's Adventures in Wonderland

The day Lewis Carroll rowed up the Thames with Alice

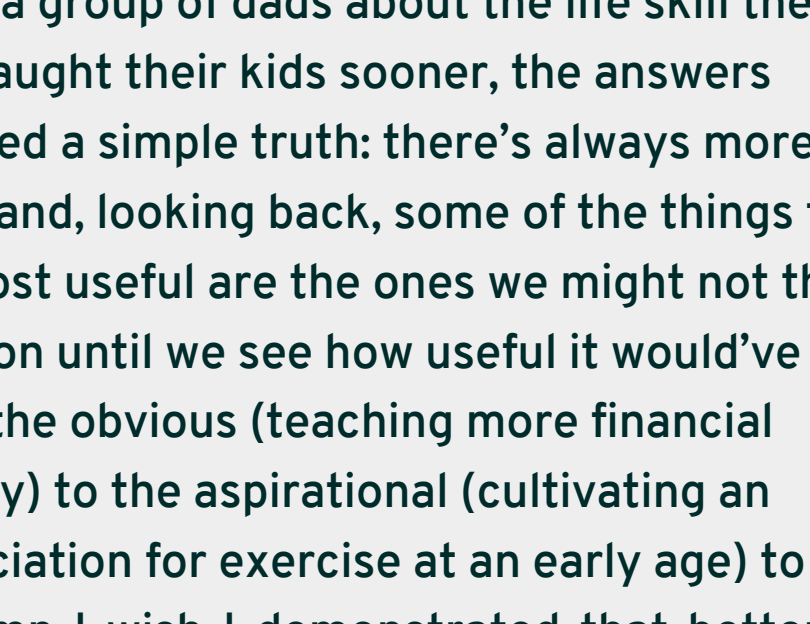

Wiki Rabbit Hole

" Alice's Adventures in Wonderland was inspired when, on 4 July 1862, Lewis Carroll and Reverend Robinson Duckworth rowed up The Isis in a boat with three young girls.[6][7] The three girls were the daughters of scholar Henry Liddell: Lorina Charlotte Liddell (aged 13; 'Prima' in the book's prefatory verse); Alice Pleasance Liddell (aged 10; 'Secunda' in the verse); and Edith Mary Liddell (aged 8; 'Tertia' in the verse).

The journey began at Folly Bridge, Oxford, and ended 5 miles (8.0 km) away in Godstow, Oxfordshire. During the trip Carroll told the girls a story that he described in his diary as "Alice's Adventures Under Ground" and which his journal says he "undertook to write out for Alice". Alice Liddell recalled that she asked Carroll to write it down: unlike other stories he had told her, this one she wanted to preserve. She finally got the manuscript more than two years later. "

**We are very new to existence
Facts That Will Warp Your Sense of Time**

" 11. You can fit all of human history (and then some) between the periods when the Stegosaurus and T. Rex existed.

Sue the Tyrannosaurus Rex on Display in Washington D.C.

Our tendency to lump large chunks of history together is never more apparent than it is with dinosaurs. It's easy to assume that all our favorite prehistoric species of land, air, and sea co-existed until that infamous meteor wiped them out in one fell swoop. That's not how it went down.

The Stegosaurus, for example, lived during the Late Jurassic Period, roughly between 159 and 144 million years ago. The T. rex didn't appear until the last leg of the Late Cretaceous period, some 68 million years ago.

In the span between the two dinos, you could fit the entire course of human history, including the millions of years occupied by our early ancestors ... approximately 12 times over. So an illustration of a T. rex chasing a stegosaurus should strike you as very anachronistic—technically more than one in which a T. rex clutches a Tamagotchi in its tiny talons. "

**She was rock and roll before rock and roll
How Sister Rosetta Tharpe became an electric guitar trailblazer**

" Rosetta Nubin was born on 20 March 1915 in Cotton Plant, Arkansas, a small town sandwiched between the Midwestern and Southern states. Both parents were cotton workers, although Rosetta didn't know much of her father except that he sang in his spare time. Her mother, Katie, was deeply ensconced in the local church as both deaconess, vocalist and mandolinist.

Clearly a child prodigy, by the age of six Rosetta was performing with her mother, singing and playing guitar under the name Little Rosetta Nubin as part of a travelling evangelical group. "

**For all parents new and to be,
not just Dads
Important life skills dads wish they taught their kids sooner**

" How to 'square up' failure. How to use tools properly. How to take care of your home. When we asked a group of dads about the life skill they wish they taught their kids sooner, the answers revealed a simple truth: there's always more to teach and, looking back, some of the things that are most useful are the ones we might not think to focus on until we see how useful it would've been. From the obvious (teaching more financial literacy) to the aspirational (cultivating an appreciation for exercise at an early age) to the oh-damn-I-wish-I-demonstrated-that-better (how to forgive someone), here are the life skills these men wish they taught their kids sooner. "

“Let them think what they liked, but I didn't mean to drown myself. I meant to swim till I sank -- but that's not the same thing.”

Joseph Conrad
