Have a great day,
find your way

The Alien Life

The twins could never figure out how Blue Kevin always knew when they were mad at each other.

Hi

Can anyone outrage you more than a sibling?

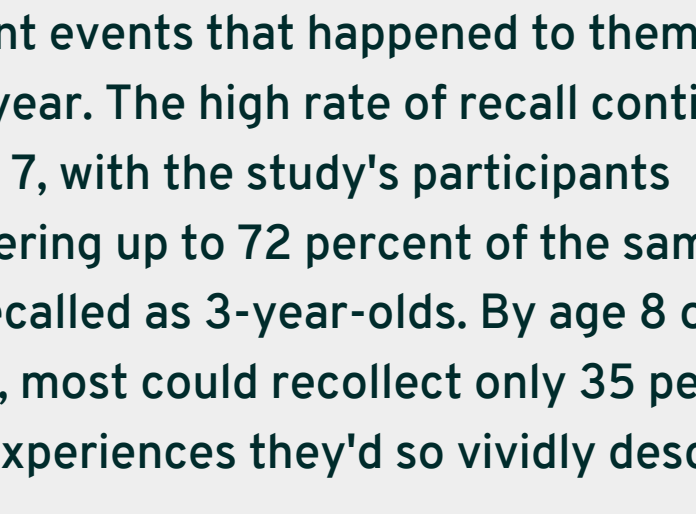

I don't remember
how I came to be
running up the stairs,
pursued by wrath,
but in the moment
it felt like life or death

I know I expertly
pushed a button,
we knew where all
the buttons lay hidden,
and when you see
a button, on occasion,
you must push it

No one really knows
why this is so,
known only is the truth:
the sibling can be
a ruthless beast

Growing focus

Why can't we remember being babies?

" Up until age 3, children in one study could recall significant events that happened to them within the last year. The high rate of recall continued until age 7, with the study's participants remembering up to 72 percent of the same events they'd recalled as 3-year-olds. By age 8 or 9, however, most could recollect only 35 percent of the life experiences they'd so vividly described at 3. "

For future pilots

Flight Instruments Explained

" With technology advancing at an astonishing pace, flight instruments are becoming more sophisticated and reliable than ever before. Today's flight instruments offer unprecedented accuracy and functionality. "

Maybe both

Is Mathematics An Invention Or A Discovery?

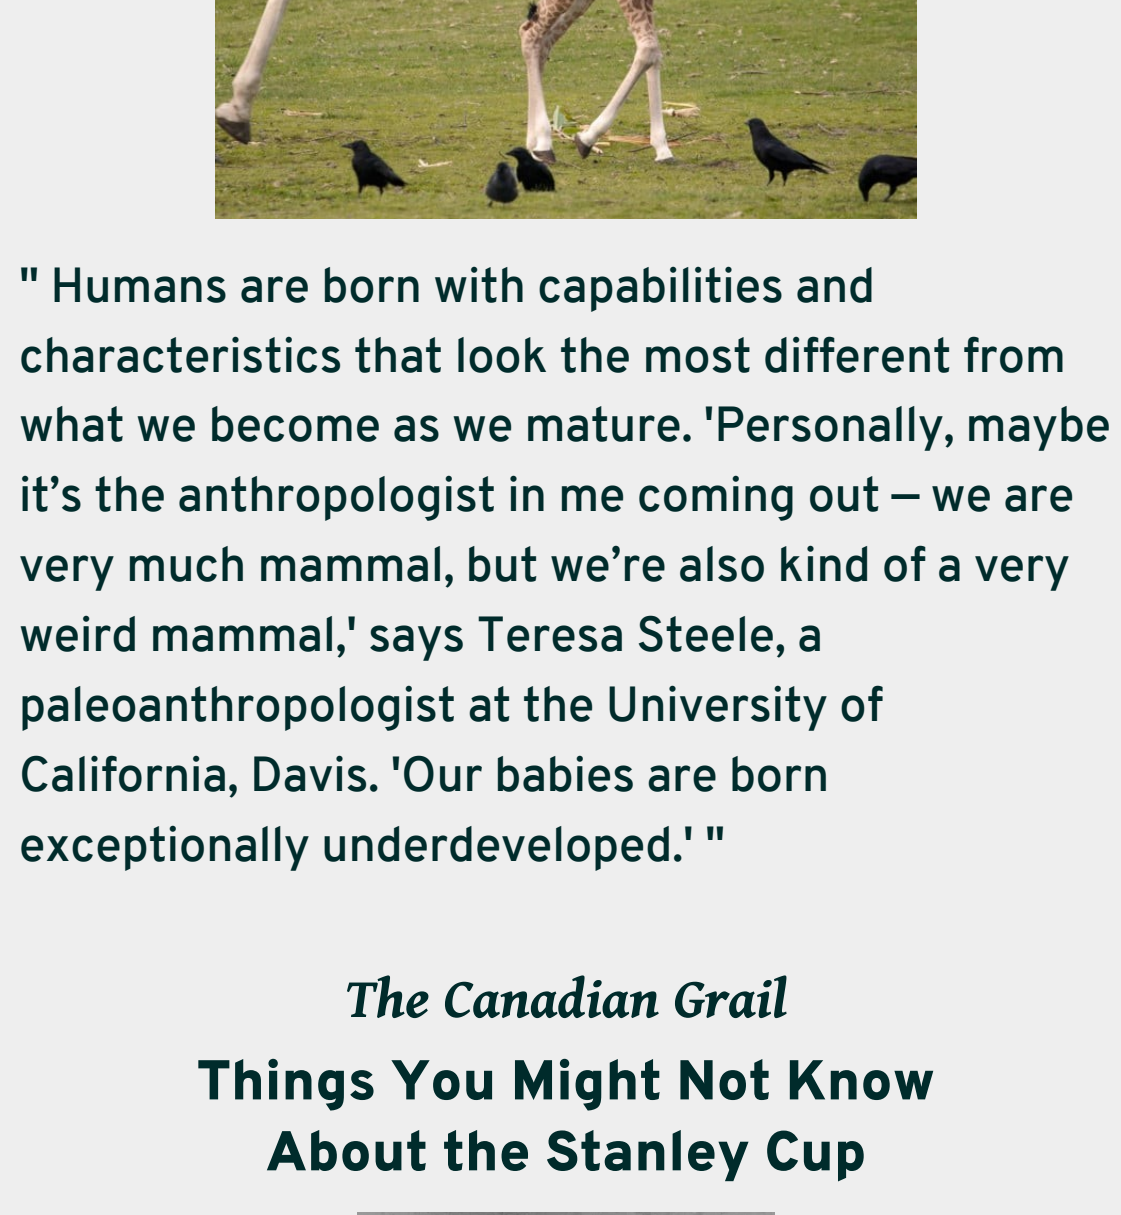

" Some believe that mathematics exists within us, and that the objects of mathematics were therefore our creation. Other philosophers thought that mathematics exist independent of our thoughts, outside of us. However, does the truth lie somewhere between the stark choice of being invented or discovered? To better understand the truth, let's try to understand exactly how old math really is. "

June 7, 1929

The Lateran Treaty

Vatican City State established

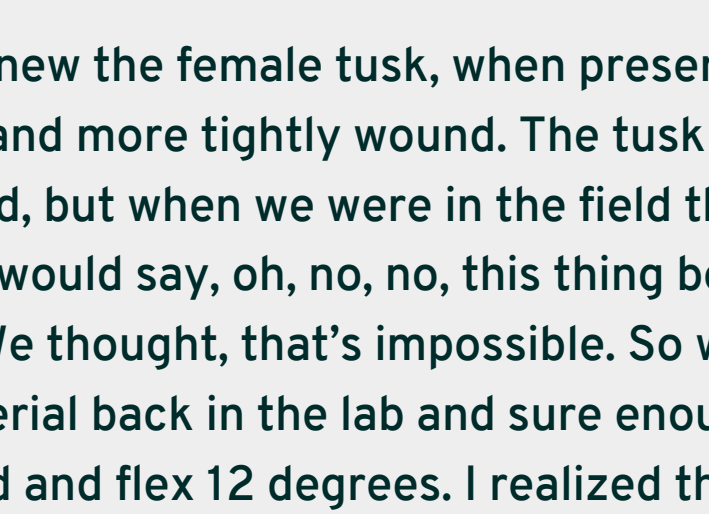

Wiki Rabbit Hole

" With an area of 49 hectares (121 acres) and as of 2023 a population of about 764, it is the smallest state in the world both by area and by population. As governed by the Holy See, Vatican City State is an ecclesiastical or sacerdotal-monarchical state ruled by the Pope, who is the bishop of Rome and head of the Catholic Church.

Vatican City contains religious and cultural sites such as St. Peter's Basilica, the Sistine Chapel, the Vatican Apostolic Library, and the Vatican Museums. They feature some of the world's most famous paintings and sculptures. "

No time to lay about

Why Baby Animals Can Walk So Much Sooner Than Human Infants

" Humans are born with capabilities and characteristics that look the most different from what we become as we mature. 'Personally, maybe it's the anthropologist in me coming out – we are very much mammal, but we're also kind of a very weird mammal,' says Teresa Steele, a paleoanthropologist at the University of California, Davis. 'Our babies are born exceptionally underdeveloped.' "

The Canadian Grail

Things You Might Not Know About the Stanley Cup

" Stanley's original cup from 1892, known as the Dominion Hockey Challenge Cup (above), was awarded until 1970, and is now on display in the Vault Room at the Hockey Hall of Fame in Toronto.

In 1963, NHL president Clarence Campbell believed that the original cup had become too brittle to give to championship teams, so the Presentation Cup was created and is the well-known trophy awarded today. "

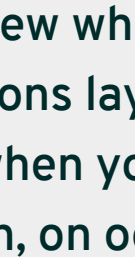

That's a tooth

The charismatic narwhal

" They knew the female tusk, when present, is thinner and more tightly wound. The tusk seems very rigid, but when we were in the field the hunters would say, oh, no, no, this thing bends and flexes. We thought, that's impossible. So we get the material back in the lab and sure enough, it can bend and flex 12 degrees. I realized that they were going to be the most important key link for me to get the knowledge I needed to inform the science. "

"You may not control all the events that happen to you, but you can decide not to be reduced by them."
Maya Angelou
